

Water represents an existential challenge for Mexico City, which is threatened by both water scarcity and flooding. The solutions lie in its existing natural assets. Reminders come each year when heavy rains bring flooding. At other times water scarcity is a problem and subsidence due to water extraction is ongoing. The Water Fund is a critical initiative.

## MEXICO CITY - WATER FUND

Air pollution, traffic congestion, lack of green space, water retention to combat droughts and intense rainfalls, loss of agricultural land and soil organic matter content are considered pressing environmental challenges in Tianjin. Green space development and the Eco Valley in Tianjin is fundamentally important to livability.

## TIANJIN - ECO VALLEY

Winnipeg is a river city and yet public waterfront access and development have been limited by increasingly frequent and severe floods, erosion, loss of vegetation and land ownership patterns. However, over the last decade, interest in the city River Front has grown significantly after investments to better use this space.

## WINNIPEG - RIVER FRONT
